August 18, 1995

Mr. Tom Bloodworth
U.S. Army Corps of Engineers
#8 Cocks Crow
Staunton, IL 62088

Dear Tom:

This letter is written to document the action items discussed in our telephone conversation on August 7, 1995, regarding the NL Industries site in Granite City, Illinois:

1. Resolve the remaining discrepancies on the restoration of properties that have been previously remediated (e.g., 1410 Grand). These discrepancies must be put in writing with a signature block for EPA and the resident(s). A final signature must be obtained from the resident(s) stating that all restoration work has been performed satisfactorily,
2. From this point forward, any actions taken that are not strictly to restore a property to its original condition must be put in writing with as much specificity as possible and signed by the EPA and the resident prior to implementation,
3. Test the truck lot at 1420 State Street for lead and provide results to me as soon as possible, and
4. Provide a cost estimate for completion of remedial activities at all remaining remote fill areas and specifically for Sand Road #1, Sand Road #2, and Schaeffer Road.

If you have any questions concerning this letter, please contact Sheri L. Bianchin at (312) 886-4745, or me at (312) 886-4742.

Sincerely,

Sheri L. Bianchin

for Brad Bradley
